KOMARAC 3
SINGLE USE ARMED DRONE

Commercially available drones for single use armed with BGEFP 150 anti-armored cumulative fragmentation warhead of 150 mm caliber. They are intended for actions against armored vehicles, lightly fortified targets and manpower. The system is guided manually toward the target via station or camera control. In order for BGEFP 150 to act properly (properly formed projectile), the fuse must activate the warhead at the distance of 2 m from the target with the use of optical proximity sensor (LIDAR). These types of warheads with EFP are not affected by additional protection from UAV (nets, grids, etc.).

TECHNICAL SPECIFICATIONS:

BGEFP 150 warhead of 150 mm caliber

- Maximum weight: 5 kg
- Flight time: 3 minutes
- Penetration: 140 mm
- Range: 2 km
