SILENCER FOR ASSAULT RIFLE 7,62x39mm AK47, AKM

Shot intensity measured at a distance of 10m / 45°, laterally relative to barrel muzzle with burst noise measuring device passing through filter by which the sensitivity of measuring device is appropriate to human ear characteristic. The first measured value refers to suppression level measured for the ammunition having subsonic bullet and the other refers to standard ammunition.

Length [mm]	**Mass [kg]**	**Diameter max/internal [mm]**	**Suppression level -dB(AI)**
225	0,62	54 / 43	21/10**
