9 mm, CZ 999
Pistol

Pistol CZ999 is a semi-automatic gun, functioning on the principle of short recoil of the barrel. Locking is achieved by vertical oscillation of the barrel, that comes into the hole on the slide. Pistol is a modern weapon used as service gun and as self-defence gun. Due to excellent design, ergonomy, state-of-the-art technology methods in production, gun is distinguished by precision, accuracy and functionality. The frame of the pistol is made of aluminium alloy, so a robust gun has small weight. Chrome plated barrel guarantees long service life and easy maintenance.

It functions as a single action or a double action pistol. Feeding is done from a double-row detachable magazine with the capacity of 10 or 15 rounds. All controls on the pistol are ambidextrous and they can be used either with the left or the right hand. The design of the pistols enables the controls to have several functions. Loaded chamber indicator shows whether a round is in the barrel. Sights are square, with white dots and they provide easier aiming when the visibility is low.

All other characteristics, except the ones regarding the barrel length (length of the slide and the pistol, weight) are identical to the characteristics of standard models.

TECHNICAL DATA:

• Caliber (mm)	9 x 19
• Magazine capacity	15/10
• Weight of weapon (kg)	0.94
• Total length (mm)	198
• Barrel length (mm)	108
• Height (mm)	140
