82 mm, M69A

Mortar

A weapon with smooth bore is designed for fire support primarily within infantry units. Viewed from the aspect of its application, mortar is a simple, reliable and very efficient weapon. Its main feature is firing at high angles of elevation from 45° to 85°, thus enabling strikes against the enemy sheltered by trenches or other obstacles. Main components of mortar comprise barrel with breechblock, base plate, bipod support, sighting device and weapon set of tools, spares and accessories.
