30 mm, M93
Grenade launcher

Automatic grenade launcher M93 is an infantry weapon intended for destruction of uncovered and covered live force at distances up to 1700 m, as well as for destruction of light armoured vehicles at distances up to 1000 m. The interior of the barrel is chrome plated. Automatic grenade launcher M93 can only fire bursts, and the rate of fire can be changed. It is loaded from a belt that is placed in the drum. The drum has the capacity of 29 grenades. It uses 30 mm HE, HEAT, practice and practice-marker grenades. The design of tripod enables quick change from marching to combat position and vice versa.

Automatic Grenade Launcher M93 set includes: 30 mm Grenade Launcher, mount, sighting device NSBG-1, ammunition boxes with belts (30 links). As option, at customer's request in set can be included belt filler and rectification sight DR - 30.

At customer's request and depending on tactical purpose, Automatic Grenade Launcher M93 is assembled to combat vehicles and helicopters.
