DEFENCE & DIGITAL SYSTEMS

Digital optical sight

BAAS visualisation; configuration may vary.

OVERVIEW

An optical observation device that can share measured viewing information with compatible control equipment.

PROFILE HIGHLIGHTS

- Optical observation - Uses an optical observation element to support the wider system picture.
- Connected operation - Supports information exchange with compatible command elements.
- Flexible configuration - Can be configured around the intended platform and requirement.

Discuss your requirement with BAAS

Product configuration and scope are confirmed for the individual enquiry.
